

Dear friends and colleagues,

I am pleased to introduce to you the **Digital World 2030 – place for Europe** report recently released by the European Internet Foundation (EIF). The report will serve as an important introduction and information among others for the members of European Parliament to be elected soon. CECUA as an EIF member to many years worked with EIF preparing the report focusing on broadening the stakeholder spectrum including the users.

In specific the report provides a good document

- with high quality of content and presentation
- covering a wide range of content
- with rather fairly balanced content
- suitable for the set targets and different target groups, including European Parliament

I urge you to study the report and provide comments if you so wish. The report is available at <https://www.eifonline.org/digitalworld2030>

Best Wishes,

Dr Jon Thorhallsson

CECUA President
